PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience, progressively expanding toward DevOps practices: containerization, CI/CD pipelines, and workflow automation. Experienced in both institutional and SaaS projects, I thrive in environments that value technical rigor and autonomy. Available for local (Cameroon / Africa) and remote engagements.

TECHNICAL SKILLS

BACK-END & FRONT-END

Languages	Kotlin	Java	JavaScript	TypeScript	Python	
Frameworks	Spring Boot	Next.js 14	React.js	Vue.js	Flutter	KMP
API & Arch.	REST API	Microservices	OAuth2/JWT	GraphQL		

DEVOPS & CLOUD

Containers	Docker ●●●●	Docker Compose ●●●●	Nginx ●●●●
CI/CD	GitHub Actions ●●●●	Git ●●●●	Ansible ●●●●
OS	Linux (Ubuntu/Debian) ●●●●	Bash scripting ●●●●	VPS management ●●●●

AI & AUTOMATION

Automation	n8n ●●●●○	Make (ex-Integromat) ●●○○○	Webhooks & APIs ●●●●○	
AI Dev Tools	Claude Code ●●●●○	Cursor ●●●●○	Ollama (LLM local) ●●●●○	Prompt Eng. ●●●●○
LLMs & RAG	Anthropic API ●●●○○	OpenAI API ●●●○○	LangChain (bases) ●●○○○	

DATA & MISCELLANEOUS

Databases	MongoDB	PostgreSQL	MySQL	
CMS & Mobile	Strapi v4	WordPress	Jetpack Compose	KMP
Electronic Records Management	DMS / ERM	Normes ISO 15489 / NF Z42-013	Dématérialisation de documents	

WORK EXPERIENCE

Lead Software Architect & Developer — RH-SYSTEM

Jul. 2025 – Present

Université de Yaoundé II – Soa · Yaoundé, Cameroon · Institutional Contract

Web-based HR management and payroll system for ~1,000 university staff members.

- Requirements gathering, drafting of Terms of Reference (TOR), and functional/technical specifications.
- Microservices architecture: Spring Boot/Kotlin REST API backend + React.js/TypeScript frontend.
- MongoDB data modeling: ~1,000 employee records, payroll history, and grade advancement tracking.
- Automated salary computation engine compliant with Cameroonian regulations (CNPS, income tax).
- GitHub Actions CI/CD pipeline with Docker/Nginx deployment on VPS.

- Contract documentation: OHADA-compliant contracts, addendums, and progress reports.

Stack : React.js, TypeScript, Spring Boot, Kotlin, MongoDB, Docker, Nginx, GitHub Actions

Automation & AI Engineer — KOBE Corporation

2025 – Present

KOBE Corporation · Yaoundé, Cameroon · Internal & Client Projects

Design and deployment of business process automation workflows and AI integrations.

- Deployment and administration of a production n8n instance (n8n.kobecorporation.com) on VPS.
- Design of automated workflows: API integrations, event-driven notifications, data processing pipelines, and structured web scraping.
- AI-assisted feature development using Claude Code and Cursor (measurable productivity gains).
- Integration of LLM APIs (Anthropic, OpenAI) into business applications for content generation and document analysis.
- Local LLM inference via Ollama for offline and privacy-sensitive use cases.
- AI tools training and awareness sessions for junior developers within KOBE Corp.

Stack : n8n, Claude Code, Cursor, Anthropic API, Ollama, Docker, VPS (Linux), Webhooks, REST APIs

Instructor — Web Architecture Security

2024 – 2025

Independent Professional Training · Yaoundé, Cameroon

Training program on secure software architectures (undergraduate students, Years 1–3).

- Curriculum covering: Monolithic, N-Tier, SOA, Microservices, API Gateway, Service Mesh, Serverless, and Multi-tenant architectures.
- Architecture-specific security profiles, OWASP Top 10 threat mapping, JWT and OAuth2.
- Designed comprehensive teaching materials (lectures, lab exercises, case studies).

Training program on Programming Languages and Frameworks (undergraduate students, Years 1–3).

- Web programming fundamentals: HTML/CSS
- Version control and collaboration tools: Git/GitHub
- Web development with the React.js Framework

Freelance Full Stack Developer

Dec. 2025 – Present

KOBE Corporation · Yaoundé, Cameroon · Client Contracts

Custom web development, technical consulting, and integrations for SMBs and institutions.

- Full stack web application development for local clients (frontend + backend + deployment).
- Software architecture consulting and digital transformation advisory.
- Full delivery cycle: requirements scoping → development → QA testing → release → maintenance.

Stack : React.js, Spring Boot, Kotlin, Docker, MongoDB

Link: <https://kobecorporation.com>

Android Developer Intern

Jul. – Sep. 2024

École Normale Supérieure de Yaoundé (ENS) · Yaoundé, Cameroon · Supervised Internship

Mobile application for tracking and managing teaching staff records.

- Developed a native Android application (staff profiles, attendance tracking, data exports).
- Internal delivery and deployment — internship completed successfully.

Stack : Kotlin, Jetpack Compose, Room Database, Android SDK

Consultant — Electronic Records Management Systems

2025 – 2026

Revolut Consulting · Consulting Assignment

Design and deployment of an Electronic Records Management system (ERM/SAE) compliant with international standards.

- Requirements analysis, design of the document classification scheme, and records retention policy.
- Document digitization and indexing of archival collections — implementation of ISO 15489 and NF Z42-013 standards.
- Implementation of a validation and electronic signature workflow for official documents.

KEY PROJECTS

► RH-SYSTEM — University HR Management & Payroll

2025 – Present

Institutional solution for HR management and payroll automation (~1,000 staff members).

- Payroll computation engine compliant with Cameroonian labor law (CNPS, income tax).
- HR analytics dashboard with PDF/Excel export functionality.
- Containerized VPS deployment with Nginx reverse proxy and SSL termination.

Stack: React.js, TypeScript, Spring Boot, Kotlin, MongoDB, Docker, Ansible, GitHub Actions, Nginx

Link: [Deployed on-premise](#)

► BlogPress — Blogging Platform & Social Network

Sep. – Dec. 2025

Long-form content publishing SaaS with a rich text editor and community features.

- Rich-text editor, Markdown support, embedded media, subscription system, and social sharing.
- Secure auth with JWT + OAuth2 (Google, GitHub) — headless API architecture with SSR.

Stack: React.js, Spring Boot, Kotlin, MongoDB, Docker, JWT, OAuth2

Link: [blogpress-app.com](#)

► GIZ-TRIDOM Multisite Portal (Technical Bid — Active Development)

Mar. – Jun. 2026

Response to GIZ RFP: bilingual FR/EN institutional portal for multiple organizational entities.

- Decoupled architecture: Strapi v5 (headless CMS) + Next.js 14 + PostgreSQL 15.
- Multi-environment deployment pipeline, WCAG 2.1 accessibility compliance, and Core Web Vitals optimization.

Stack: Next.js 14, Strapi v5, PostgreSQL 15, Docker, Nginx, GitHub Actions

AI & AUTOMATION

Instance n8n de production — [n8n.kobecorporation.com](#)

- Deployment and administration of a self-hosted n8n instance on VPS (Docker + Nginx + SSL).
- Design of business automation workflows: cross-system data synchronization, automated alerts, form processing, CRM/email integrations.
- Automation of KOBÉ Corporation internal processes (invoicing, client onboarding, notifications).

AI-Assisted Development — Tools & Practices

- Claude Code: backend code generation and refactoring (Spring Boot/Kotlin), automated test writing, code reviews — estimated +40% productivity gain on repetitive tasks.
- Cursor: AI-powered IDE used daily for frontend development (Next.js/TypeScript) and large codebase navigation.
- Ollama: local LLM inference (LLaMA 3, Mistral) for privacy-sensitive use cases without sending data to the cloud.
- LLM API integration (Anthropic Claude, OpenAI) in business applications: report generation, document analysis, internal chatbots.
- Prompt Engineering: design of structured prompts for code generation, data analysis, and classification workflows.

Roadmap & Ongoing Projects

- Building a business AI agent (RAG + n8n) to automate document management for KOBÉ Corp.
- Exploring LangChain for building RAG pipelines on internal knowledge bases.

Founder & CEO · Dec. 2025 – Present

Cameroonian tech startup — software development, SaaS products, AI solutions, consulting & training.

- ▶ Monthly SaaS offering (starting at 15,500 XAF/month): hosting, development, maintenance, support.
- ▶ Institutional contracts with OHADA-compliant clauses and CCJA arbitration provisions.
- ▶ Multi-channel digital marketing: LinkedIn, Facebook, WhatsApp Business, Instagram, X.
- ▶ Mentoring of junior developers and delivery of technical training sessions.

EDUCATION

2026	Bachelor's in IT Engineering — Software Engineering <i>Year 4 · Specialization: Software Engineering</i>	IAI Cameroon, Yaoundé
2025	Professional Bachelor's Degree — Software Engineering <i>Year 3 · Track: Software Development</i>	IAI Cameroon, Yaoundé
2024	Higher Technician Diploma (HND) — Software Engineering <i>Year 2 · Higher Technician Diploma</i>	IAI Cameroon, Yaoundé

CERTIFICATIONS & CONTINUING EDUCATION

Certification / Training	Organization	Year	Status
Docker & Kubernetes Fundamentals	Self-taught / Udemy	2024	In Progress
n8n Workflow Automation — Certification	n8n Academy	2025	In Progress
CompTIA Security+	CompTIA	2026	Planned
AWS Solutions Architect Associate	Amazon Web Services	2026	Planned
Spring Professional Certification	VMware / Broadcom	2026	Planned

Active Tech Watch: GitHub, Dev.to, Medium Engineering Blogs, Anthropic Docs, n8n Community, official Spring / Next.js / Docker documentation.

ACHIEVEMENTS & DISTINCTIONS

- ▶ Secured institutional contract at age 22 — HR digitalization for Université de Yaoundé II (~1,000 employees)
- ▶ Deployed a self-hosted production n8n automation instance (n8n.kobecorporation.com)
- ▶ Founded KOBE Corporation and launched a commercial SaaS product (in active development)
- ▶ Delivered web architecture security training program — 2024/2025
- ▶ Submitted full response to GIZ-TRIDOM RFP (bilingual multisite institutional portal)

LANGUAGES

French Native language	English Intermediate — B1/B2 (actively improving)	Technical English Proficient (written) — docs, GitHub, Slack, APIs
----------------------------------	---	--

INTERESTS & TECH WATCH

- ▶ Generative AI & autonomous agents — actively tracking developments (Anthropic, OpenAI, Mistral)
- ▶ No-code/low-code automation — n8n
- ▶ Cloud Security / DevSecOps — training & certifications
- ▶ Tech Entrepreneurship in Sub-Saharan Africa
- ▶ Open Source — GitHub contributions & ecosystem watch
- ▶ Fitness & personal discipline · Technical pedagogy
- ▶ Reading, Sports

AVAILABILITY & MOBILITY

Availability

Immediate — local assignments, remote, travel.

Mobility

Driver's license · France, Belgium, Canada, Europe, Africa
· Remote-friendly.
